CS 225 Data Structures Team Contract

Project Name: Flight Analytics
Members: (Rohan Rodrigues - rohanbr2)

Even though I will be working by myself, this is the contract to hold myself accountable for the work in this final project.

Communication

I will:
- Start looking into the datasets and brainstorm ideas for the various algorithms my project will run.
- Contribute to the best of my ability and actively seek out other students or instructors if I need guidance on the project.

Collaboration

I will:
- Start by identifying a dataset that I'm interested in analyzing
- Refresh my knowledge on all the algorithms listed in the Project Goals document
- Split up the work so that I don't end up working on the project at the last minute.
